

EQ105-15 Social Contexts of Childhood and Education

21/22

Department

Education Studies

Level

Undergraduate Level 1

Module leader

Mark Pulsford

Credit value

15

Module duration

10 weeks

Assessment

100% coursework

Study location

University of Warwick main campus, Coventry

Description

Introductory description

This module discusses the ways in which childhood, education and schooling are interconnected and perceived. Throughout the module you will explore a number of arenas through which children are nurtured, protected and socialised, including family, peer group and the virtual world of the mass media and digital technology, considering historical and contemporary developments. Students will also consider the impact of class, poverty, gender and ethnicity on education and childhood.

[Module web page](#)

Module aims

1. To examine the range of contexts within which education takes place
2. To explore the relationship between children, childhood and schooling
3. To advance students knowledge of children's engagement with education

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

This module will focus on the social and cultural aspects of education, with a particular focus on the relationship between children, childhood and schooling. There is an important historical dimension to this with the rise of school systems in many affluent countries both paralleling and implicated in the shaping of modern childhood. A second general theme explores the relationship between children, their families and education. A number of significant social dimensions to children's education will be examined, the relationship between poverty and schooling, the gender gap in education, the role of social class in shaping children's educational life chances and peer relations in school. Thirdly, the cultural dimension to schooling is significant in terms of the attitudes, expectations and practices relating to education at national and global levels.

Indicative Content

- A short history of childhood and schooling
- Contexts of education: children and families
- Poverty and schooling
- Parents, Schooling and Social Class
- The gender gap in education
- Peer relations in school
- Children's participation

Learning outcomes

By the end of the module, students should be able to:

- Understand the range of contexts in which education takes place
- Understand the relationship between children, childhood and schooling
- Advance students' knowledge of children's engagement with education
- Understand the role of social contexts in shaping differential school based outcomes

Interdisciplinary

The module uses a sociological lens to examine children and childhood. It also covers historical understandings of childhood.

Subject specific skills

Students should demonstrate a critical understanding of -

- the underlying values, theories and concepts relevant to education
- the diversity of learners and the complexities of the education process
- the complexity of the interaction between learning and local and global contexts, and the extent to which participants (including learners and teachers) can influence the learning process
- the societal and organisational structures and purposes of educational systems, and the possible implications for learners and the learning process
- theories, practice and research in the area of education
- psychological, sociological, historical and philosophical perspectives and consider how these underpin different understandings of children and childhood
- competing positions in relation to the construction of children and childhood by different subjects, societal agents and time, place and culture
- the interrelationships between political, economic, cultural and ideological contexts in the lives of children and their families and communities

Transferable skills

- Active listening
 - Communication skills
 - Confidence
 - Coordinating with others
 - Critical thinking
 - Interpersonal and communication skills
 - Judgement and decision making
 - Management of learning
 - Motivation, tenacity, commitment
 - Negotiation
 - Passion
 - Personal development skills
 - Planning and organisational skills
 - Team working
-

Study

Study time

Type	Required
Lectures	10 sessions of 1 hour (7%)
Seminars	20 sessions of 1 hour (13%)
Tutorials	(0%)
Private study	90 hours (60%)
Assessment	30 hours (20%)
Total	150 hours

Private study description

Independent study hours include background reading, completing reading/other tasks in preparation for timetabled teaching sessions, undertaking research using the library resources, follow-up reading work, working on individual and group projects, the completion of formative and summative assignments, revision.

Costs

No further costs have been identified for this module.

Assessment

You must pass all assessment components to pass the module.

Assessment group A1

	Weighting	Study time
Poster and Annotated Bibliography	100%	30 hours

Throughout the module, students will build up an annotated bibliography (summaries of key research papers/chapters) with support from the module tutor. This document will be completed and used by students to inform the production of an 800-word academic poster on a topic derived from the module's themes. The annotated bibliography must be submitted by students but the poster is the only summatively assessed element. Students will describe and discuss their posters with peers in the final seminar of term.

Feedback on assessment

Individual poster feedback.
