Learning outcomes

By the end of the module, students should be able to:

- 1. Formulate an advanced conceptual model from a real-world supply chain case or part of it, by interpreting its associated management issues from a much wider and more strategic supply chain perspective.
- 2. Creatively conduct an independent evaluation and/or critical analysis on any of the following key supply chain management approaches that might be dominating the real-world case in question, including: strategic outsourcing; end-to-end supply chain integration; supplier-buyer relationships, partnership and collaboration; supply-base development; win-win sourcing; lean and agile supply management; customer driven value-adding; and so on.
- 3. Demonstrate a sound and advanced skill set in rigorously reasoning and articulating any real-world supply chain issues through applying learned frameworks, models and tools to reveal the underlying connections of complex conceptual factors within the supply chain systems while engaging scholarly literatures autonomously.
